2	Assignments	1
3	Projects/Research Essays/Theses	2
	Total	4

* The length of time that a learner takes to complete learning activities that lead to achievement of course learning outcomes, such as study time, homework assignments, projects, preparing presentations, library times

B. Course Objectives and Learning Outcomes

1. Course Description

It will provide students with a thorough understanding of the principles and practices of using the Internet to market goods and services. It examines the demographics of the Internet and the various business models employed in online marketing, explores techniques and methodologies for conducting online market research and developing competitive intelligence in an organization. In addition, the course details processes for planning and implementing a comprehensive e-marketing strategy using alternative online pricing strategies, Web-based advertising and promotion, and Internet distribution channels; it also considers other critical issues, such as customer acquisition and retention and the challenges faced by firms in the application of e-marketing strategies in global markets.

2. Course Main Objectives

The main objectives for this course are the following:

1. Identify the opportunities and threats and of e-marketing.
2. Understand the strategy paradigm base on customer acquisition, lead conversion, customer retention, and growing customer value.
3. Show that digital marketing is only effective if strategies and messages are integrated across media.
4. Explain technological subjects in a manner that can be successfully grasped by students with only introductory or user-level familiarity with computer technology.
5. Discuss the planning, development, execution, and evaluation of e-marketing campaigns across multiple channels.
